## For Research Use Only

## FITC Plus Anti-Human CD45RA (HI100)

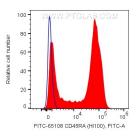

Catalog Number:FITC-65108

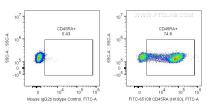

Basic Information	Catalog Number: FITC-65108	GenBank Accession Number: BC014239	Purification Method: Affinity purification
	Size: 100tests , 5 µl/test	GenelD (NCBI): 5788	CloneNo.: HI 100
	Source: Mouse Isotype: IgG2b, kappa	Full Name: protein tyrosine phosphatase, receptor type, C	Excitation/Emission maxima wavelengths: 494 nm / 520 nm
Species Specificity: Human			
Background Information	CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). CD45 exists as multiple isoforms due to alternative splicing of three exons (4, 5, and 6, designated A, B, and C) in the extracellular domain (PMID: 12414720). CD45RA is expressed on naïve T cells, B cells, and monocytes (PMID: 1830500; 14687231).		
Storage	Storage: Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer: PBS with 0.09% sodium azide and 0.5% BSA.		

For technical support and original validation data for this product please contact:T: 1 (888) 4PTGLAB (1-888-478-4522) (toll freeE: proteintech@ptglab.comin USA), or 1(312) 455-8498 (outside USA)W: ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

1X10<sup>^6</sup> human PBMCs were surface stained with 5 ul FITC Anti-Human CD45RA (FITC-65108, Clone:HI 100) or Mouse IgG2b Isotype Control. Cells were not fixed. Lymphocytes were gated.

1X10<sup>^</sup>6 human PBMCs were surface stained with 5 ul FITC Anti-Human CD45RA (FITC-65108, Clone:HI 100) (red) or Mouse IgG2b Isotype Control. Cells were not fixed. Lymphocytes were gated.
