### For Research Use Only

# FITC Plus Anti-Mouse PD-1/CD279 (RMP1-30)

www.ptglab.com

Catalog Number:FITC-65142

1 Publications

**Basic Information** 

Catalog Number:

FITC-65142 Size:

100ug , 500  $\mu$ g/ml

Source:

Isotype:

IgG2b, kappa

GenBank Accession Number:

BC119179 GeneID (NCBI):

18566 **UNIPROT ID:** 

Q02242 Full Name:

programmed cell death 1

**Purification Method:** 

Protein A purification

CloneNo.: RMP1-30

Excitation/Emission maxima

wavelengths: 495 nm / 524 nm

**Applications** 

**Tested Applications:** 

FC

**Cited Applications:** 

FC

Species Specificity:

Mouse

## **Background Information**

Programmed cell death 1 (PD-1, also known as CD279) is an immunoinhibitory receptor that belongs to the CD28/CTLA-4 subfamily of the Ig superfamily. It is a 288 amino acid (aa) type I transmembrane protein composed of one Ig superfamily domain, a stalk, a transmembrane domain, and an intracellular domain containing an immunoreceptor tyrosine-based inhibitory motif (ITIM) as well as an immunoreceptor tyrosine-based switch motif (ITSM) (PMID: 18173375). PD-1 is expressed during thymic development and is induced in a variety of hematopoietic cells in the periphery by antigen receptor signaling and cytokines (PMID: 20636820). Engagement of PD-1 by its ligands PD-L1 or PD-L2 transduces a signal that inhibits T-cell proliferation, cytokine production, and cytolytic function (PMID: 19426218). It is critical for the regulation of T cell function during immunity and tolerance. Blockade of PD-1 can overcome immune resistance and also has been shown to have antitumor activity (PMID: 22658127; 23169436).

#### **Notable Publications**

Author	Pubmed ID	Journal	Application
Hui Meng	39261658	Oncogene	FC

Storage

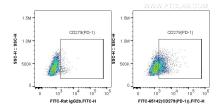

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide.

## Selected Validation Data

1X10^6 Con-A stimulated BALB/c mouse splenocytes were surface stained with 0.5 ug FITC Plus Anti-Mouse PD-1/CD279 (FITC-65142, Clone: RMP1-30) or isotype control antibody. Cells were not fixed.
