For Research Use Only

FITC Plus Anti-Human CD45RO (UCHL1)

Catalog Number: FITC-65150

Basic Information

Catalog Number: FITC-65150

100tests , 5 µl/test

BC014239

GeneID (NCBI):

5788 Full Name:

protein tyrosine phosphatase,

GenBank Accession Number:

receptor type, C

Purification Method: Affinity purification

CloneNo.: UCHL1

Excitation/Emission maxima

wavelengths: 494 nm / 520 nm

Applications

Tested Applications:

FC

Mouse

Isotype: IgG2a, kappa

Species Specificity:

Human

Background Information

CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). CD45 exists as multiple isoforms due to alternative splicing of three exons (4, 5, and 6, designated A, B, and C) in the extracellular domain (PMID: 12414720). CD45RO is the shortest CD45 isoform (lacking all three exons) and is expressed by activated and memory T cells, thymocytes, some B cells, and weakly on granulocytes and macrophage (PMID: 27100180; 12414720).

Storage

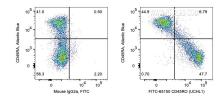

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA.

Selected Validation Data

1X10^6 human PBMCs were surface co-stained with Atlantic Blue Anti-Human CD45RA and 5 ul FITC Anti-Human CD45RO (FITC-65150, Clone: UCHL1) or Mouse IgG2a Isotype Control. Cells were not fixed. Lymphocytes were gated.
