| Product Information                            | MP02126-2 targets SOX15 in immunoassays as a matched antibody pair. Validated in Cytometric bead array.  |  |  |                                   |                 |           |
|  | Capture antibody: SOX15 Recombinant antibody, PBS Only (Capture) 85840-4-PBS (250193D11). 100 µg.<br>Concentration 1 mg/ml.  |  |  |                                   |                 |           |
|  | Detection antibody: SOX15 Recombinant antibody, PBS Only (Detector) 85840-3-PBS (250193E12). 100 µg.<br>Concentration 1 mg/ml.   |  |  |                                   |                 |           |
|  | Unconjugated rabbit recombinant monoclonal antibody pair in PBS only storage buffer at a concentration of 1<br>mg/mL, ready for conjugation. Created using Proteintech's proprietary in-house recombinant technology.<br>Recombinant production enables unrivalled batch-to-batch consistency, easy scale-up, and future security of supply. |  |  |                                   |                 |           |
|  | Matched antibody pairs are designed for use in a variety of assays and platforms that require matched antibody<br>pairs.   |  |  |                                   |                 |           |
|  | Antibody use should be optimized for each application and assay.   |  |  |                                   |                 |           |
| Storage  | Storage:<br>Store at -80°C.<br>Storage buffer:<br>PBS only   |  |  |                                   |                 |           |
