For Research Use Only

PE Anti-Mouse CD11b (M1/70)

Catalog Number:PE-65055 1 Publications

Basic Information

Applications

Catalog Number:

PE-65055

100 ug , 0.2 $\mathrm{mg/ml}$

Rat

Isotype: IgG2b, kappa

Tested Applications:

FC

Cited Applications:

FC

Species Specificity: Mouse, Human Cited Species: mouse

GenBank Accession Number:

BC156991 GeneID (NCBI):

16409

Full Name: integrin alpha M **Purification Method:**

Affinity purification CloneNo.:

M1/70

Excitation/Emission maxima

wavelengths:

496 nm, 565 nm / 578 nm

Background Information

Integrins are cell adhesion receptors that are heterodimers composed of non-covalently associated α and β subunits (PMID: 9779984). CD11b, also known as Integrin alpha M or CR3A, belongs to the integrin alpha chain family. CD11b forms an α/β heterodimer with CD18 (integrin β 2). CD11b/CD18 is implicated in various adhesive interactions of monocytes, macrophages and granulocytes as well as in mediating the uptake of complement-coated particles and pathogens (PMID: 9558116; 20008295). CD11b/CD18 is a receptor for the complement protein fragment iC3b, and is also a receptor for fibrinogen, factor X and ICAM1 (PMID: 2971974; 15485828).

Notable Publications

Storage

Storage:

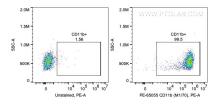

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA.

Selected Validation Data

1X10^6 mouse splenocytes were surface stained with 0.5 ug PE Anti-Mouse CD11b (PE-65055, Clone:M1/70). Cells were not fixed. Monocytes were gated.
