

# PE Anti-Human CD45RO (UCHL1)

Catalog Number: PE-65150

## Basic Information

<b>Catalog Number:</b> PE-65150	<b>GenBank Accession Number:</b> BC014239	<b>Purification Method:</b> Affinity purification
<b>Size:</b> 100tests , 5 µl/test	<b>GeneID (NCBI):</b> 5788	<b>CloneNo.:</b> UCHL1
<b>Source:</b> Mouse	<b>Full Name:</b> protein tyrosine phosphatase, receptor type, C	<b>Excitation/Emission maxima wavelengths:</b> 496 nm, 565 nm / 578 nm
<b>Isotype:</b> IgG2a, kappa		

## Applications

**Tested Applications:**  
FC

**Species Specificity:**  
Human

## Background Information

CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). CD45 exists as multiple isoforms due to alternative splicing of three exons (4, 5, and 6, designated A, B, and C) in the extracellular domain (PMID: 12414720). CD45RO is the shortest CD45 isoform (lacking all three exons) and is expressed by activated and memory T cells, thymocytes, some B cells, and weakly on granulocytes and macrophage (PMID: 27100180; 12414720).

## Storage

**Storage:**  
Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

**Storage Buffer:**  
PBS with 0.09% sodium azide and 0.5% BSA.

## Selected Validation Data

1X10<sup>6</sup> human PBMCs were surface co-stained with CL647 CD45RA and 5 ul PE Anti-Human CD45RO (PE-65150, Clone:UCHL1) or Mouse IgG2a Isotype Control. Cells were not fixed. Lymphocytes were gated.

1X10<sup>6</sup> human PBMCs were surface stained with 5 ul PE Anti-Human CD45RO (PE-65150, Clone:UCHL1) or Mouse IgG2a Isotype Control. Cells were not fixed. Lymphocytes were gated.
