

IHC Prep & Detect Kit for Rabbit/Mouse Primary Antibody

Catalog Number: PK10019

Description

The PK10019 kit is designed for developing a complete IHC workflow on FFPE samples using primary antibodies raised in rabbits/mice. The kit contains all the basic reagents, starting from antigen retrieval buffer to mounting media, that would be required for IHC staining of tissue sections with rabbit/mouse primary antibodies. By simply optimizing the primary antibody concentration and a few operational parameters, a complete IHC workflow can be easily established using this kit.

* If you are planning to use a rabbit primary antibody for staining mouse samples, we recommend using our IHC Prep & Detect Kit for Rabbit Primary Antibody (Cat.NO. [PK10017](#)).

Components

Part NO.	Component	Size
HC001	Antigen Retrieval Buffer (50× Tris-EDTA)	100 mL
HC002	Washing Buffer (30×)	120 mL
HC003	Blocking Buffer	5 mL
HC000	Quenching Buffer (RTU)	5 mL
HC004	Primary Antibody Diluent (RTU)	100 mL
HC005	Polymer HRP-Goat anti-Rabbit/Mouse Secondary Antibody	5 mL
HC006	Chromogen Component A	0.2 mL
HC007	Chromogen Component B	4 mL
HC008	Signal Enhancer	5 mL
HC009	Counter Staining Reagent	5 mL
HC0010	Mounting Media	5 mL

Size: 50-80 tests (may vary depending on tissue size).

Package

50T

Storage

All the reagents are stored at 2-8°C. The kit is stable for 6 months from the date of receipt.

Application Note

This kit is recommended for FFPE tissues and not for frozen sections.

This kit contains an antigen retrieval buffer based on Tris-EDTA by default, which in our experience is suitable for over 90% of targets. However, if a negative result is obtained using this buffer, we recommend trying alternative buffers listed below.

[PR30001](#) Sodium Citrate Antigen Retrieval Buffer 50x

[PR30014](#) Protease K Retrieval Buffer (A+B) (Heating is not required with this buffer)

Refer to user's manual for instructions on developing an IHC workflow using this kit.

Validation Data

IHC analysis of human kidney tissue using Proteintech's SLC13A3 rabbit polyclonal antibody (26184-1-AP) and IHC Prep & Detect Kit for Rabbit/Mouse Primary Antibody (PK10019).

IHC analysis of human pancreas tissue using Proteintech's Vimentin mouse monoclonal antibody (60330-1-Ig) and IHC Prep & Detect Kit for Rabbit/Mouse Primary Antibody (PK10019).
