

For Research Use Only

ChemBright CoraLite® Plus 700 Antibody Conjugation Kit

Catalog Number: PK30037

Product Information

Fluorescently-labeled antibodies can be used for a variety of immunoassays such as immunohistochemistry, immunocytochemistry, flow cytometry, and fluorescent Western blot.

This antibody conjugation kit is designed to covalently conjugate CoraLite® Plus 700 to antibodies in 1-2 hours. Conjugated antibodies can be used immediately or stored at 4°C for up to 12 months. This kit is suitable for three reactions of labeling 100 µg primary antibody.

Antibody requirements: This kit is compatible with IgGs at 1 mg/mL in carrier-free buffer (PBS) with <0.1% BSA. Antibody buffer must be azide and glycerol-free.

Components

Component	Catalog No.	Size
Vial A: Antibody Modifier Reagent	PK3003X-A	3*100 µg
Vial B: Lyophilized CoraLite® Plus 700	PK30037-B	3*100 µg
Storage Vial C	PK3003X-C	3*100 µg
Quenching Reagent	PK3003X-Q	200 µL

Package

3 x 100 µg

Storage

Store at room temperature (20-25°C) in the dark.

Additional Information

1. Titrations of the conjugated antibody are recommended to find the optimal antibody dilution for your application.
2. Store conjugated antibody in Vial C sealed at 4°C. Blank labels are provided to label Vial C.
3. It is recommended to add a preservative such as sodium azide to the conjugated antibody for long-term storage.
4. The estimated final concentration of the conjugated antibody is 0.83 mg/mL.

Validation Data

1x10⁶ Human PBMCs were surface stained with 0.2 ug Anti-Human CD8a (65135-1-Ig, clone: OKT8) labeled with ChemBright CL700 Antibody Conjugation Kit (PK30037). Cells were not fixed. Cells were treated with Fc Receptor Block (PF00029) prior to staining. Lymphocytes and monocytes were gated.
