

For Research Use Only

anti-IFN γ recombinant VHH, for NHS conjugation

www.ptglab.com

Catalog Number: IFNgNHS

Basic Information

Catalog Number:
IFNgNHS

Applications:
Conjugation

Host:
Alpaca

Conjugate:
Unconjugated

Type:
Nanobody

Class:
Recombinant

RRID:
AB_3665971

Molecular Weight:
14.4 kDa

Description

IFNgNHS is an unconjugated recombinant anti IFN γ Nanobody (VHH). Suitable for NHS conjugation.

Affinity

Picomolar range, below the assay limit (biolayer interferometry)

Background

IFN gamma (IFN γ) is a soluble cytokine that is the only member of the type II class of IFN. It is secreted by Th1 cells, cytotoxic T cells and NK cells. The cytokine is associated with antiviral, immunoregulatory and anti-tumor properties and is a potent activator of macrophages. It plays crucial roles in pathogen clearance. Aberrant IFN γ expression is associated with a number of autoimmune and inflammatory diseases. It has been identified in many studies as a biomarker for pleural tuberculosis (TB).

Storage

Storage:
Store at -20°C

Storage Buffer:
10 mM HEPES pH 7.0, 500 mM NaCl, 0.09% sodium azide

1(312) 455-8498 (outside USA) W: www.ptglab.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

BLI analysis of the interaction between varying concentrations of anti-IFN γ VHH (IFN γ NH5) and immobilised, biotinylated Human Kine Interferon γ (HZ-1301). Fit indicates fitting of data to a 1:1 binding model.
